Deepanshu Saini

I am an ambitious and detail-oriented upcoming graduate with a strong foundation in software development, particularly skilled in the MERN stack (MongoDB, Express.js, React.js, Node.js). Eager to contribute my technical skills and fresh perspectives to innovative projects, I am excited about embarking on a fulfilling career in the tech industry

EDUCATION

Bachelor of Technology, Computer Science
Maharishi Markandeshwar University, Mullana

2020 - Present   *(8.69 CGPA)*

Higher Secondary
SMB Gita Senior Secondary School, Kurukshetra

2018 - 2019   *Non-Medical (79%)*

Secondary
D.A.V Public School, Radaur

2016 - 2017   *Science (79.8%)*

PERSONAL PROJECTS

AI-SaaS ⤢
- Spearheaded the development of an AI SaaS application leveraging **MERN, Shadcn, TailwindCSS, and Clerk**, providing users with an innovative platform powered by artificial intelligence.
- Integrated the **OpenAI API** to enable the **generation of code, text, and images.**
- Designed and implemented a seamless user interface using Shadcn and TailwindCSS.
- Leveraged **Clerk for authentication** and user management, enhancing security and user control within the application.
- Developed robust features that enable users to harness the power of AI for various tasks, including code generation, text summarization, and image creation.

Discord Clone ⤢
- Developed a Discord clone utilizing modern technologies such as **Next.js, UploadThing, LiveKit, and Supabase,** providing a feature-rich communication platform.
- Implemented **real-time messaging functionality using Socket.io**, enabling seamless communication between users with instant message updates.
- Facilitated message management by **allowing users to delete and edit messages in real-time.**
- **Created text, audio, and video call channels**, allowing users to engage in various forms of communication.
- Designed a visually appealing user interface using **TailwindCSS and ShadcnUI.**
- Developed a unique **invite link generation system**, enabling users to invite others to join the platform seamlessly.

SKILLS

Javascript Java React Node Express

Next.js MongoDb Postgresql Git GitHub

Sql/NoSql Tailwind css
